Approval certificate of load bearing mastic TG-7B..

Objet:

Trappes, April 11<sup>th</sup> 1997.

HOMOLOGATION OF BEARING MASTIC FOR SECONDARY INSULATION.

- Product reference Load bearing mastic Phillymastic TG-7B.
- Reference document Report n° 8701-1 dated January 26, 1978 (reviewed March, 1992)

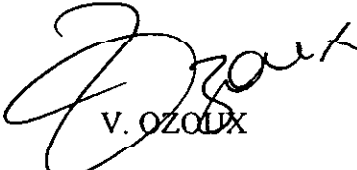

Dear sir,

On the basis of the satisfying results of tests performed according to the requirements of our specification 402F, and recorded by your report, we agree the use of load bearing product TG-7B for supporting the secondary insulation onto the inner hull of NO96 type LNG carriers.

This approval is given on the basis of tests carried out in ITW Philadelphia Resins laboratory with homogeneous components ; it falls to the product supplier by suitable production methods and quality control during production, to ensure the homogeneity of the components to be used for site production.

*NB : we recall that the crush test results, as defined in the specification 402F and performed in ITW Philadelphia Resins laboratory, are given as indicated results and shall be confirmed by the shipyard before actual use of the product using the selected automatic mix metering equipment.*

Best regards,

  
V. OZOUX
